

## Fire Extinguisher Program for Businesses

The district has several fire burn pans that allow participants to actually learn how to use an extinguisher through practical use. After a short classroom training session and video tape, participants adjourn to an outside location where they are taught, under supervision of trained fire prevention personnel, how to correctly use these life saving devices.

If you are a business owner, you are required to provide annual training which the department can provide. We provide this training at a reasonable cost. The business is required to provide the extinguisher. You can contact us for further information on fire extinguisher training at 763-354-7783 or 763-354-7754. If you need an annual inspection/testing on an extinguisher, we recommend to look in the yellow pages under "Extinguishers" for different companies that are qualified to help you.

*knowing how to use a  
fire extinguisher could  
save a life*
